Available to:
Nikon ZEISS Leica OLYMPUS

High Resolution camera, Wi-Fi 5G smart for **multiple devices in real time**, HDMI, 12 MP. Upgrade your **microscope with camera without any adapter**, between the body and observation tube.

Camera software

Windows 10

Digital Camera
PrimeCam
Intervision 12
PRO S

Product Advantages

Integrated architecture, precise coupling beam splitting

0.43X aberration correcting tube lens, precision parfocal mechanism. Seamless coupling of Nikon, Olympus, Leica, Zeiss brands of microscopes, no damage to the original optical path.

Easy focus with Allen Key

Imaging module
0.43X reduction lens
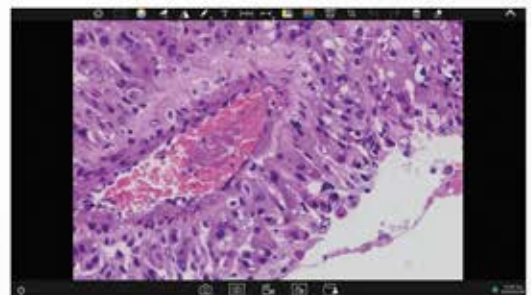

Standard C-Mount

5G WiFi

High capacity control board

With Standalone mode you don't need a computer, to use and manage your camera. Connect a keyboard and mouse to use all camera functions and storage your images.

Customized Android OS
4-core CPU + 2-core GPU
4GB DDR4 RAM
32GB EMMC hard drive
Coming with Office software

Customized built-in software

Compatible with mobile Microsoft Office and WPS office suite, can install third-party Android Apps. System resource calling, microscopic image processing, easy to operate.
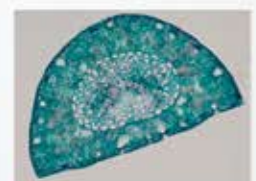

High frame rate at full resolution true color restoration

H264 image algorithm, dual stream real time output. Accurate color reproduction, under the mirror is the screen, a camera with multiple working modes.

H264   MJPG

Scalable linkage APP and PC Software

Mobile terminals or PCs equiped with the company's dedicated software (or APP) can control the camera synchronously through 5G WiFi hotspot in the main board.

Multiple image output methods

The output combinations are: 5G WiFi, HDMI.

HDMI

Recommend Dell 24~27" high color gamut monitor

5G WiFi
Synchronous output

Accessories, product dimensions and weight

| Power adapter and power cord	HDMI cable (2m)	Allen Key (3mm)	Wired mouse and keyboard

About Software and APP for Stand-alone Cameras

For Windows

Camera Screen Bult-in Software

For IOS and Android

# Windows Software: PrimeCam Pro

5G WiFi

PrimeCam Pro is a ready-to-use Windows version software that requires no additional driver installation. It works with the full range of PrimeCam 12.0MP, and higher resolution cameras and supports WiFi 5G connections, providing users with more versatile and convenient ways to transfer images.

## Staining type based on color calibration

Users can choose different image modes according to the staining method of pathological sections to obtain more accurate image color.

A - Used in bright field for slides mainly in pink or gold.
B - Used in bright field for slides mainly in cyan.
C - Used in fluorescence mainly.

Staining type
BF   BF   FL
A   B   C

Prime Life Science

Comparison Mode

The PrimeCam Pro can display any two or four images for comparison, supporting static image comparison, dynamic image comparison, static and dynamic mixed comparison。

Common tools

Open	Save	Preview	Select	Move	Undo	Redo	Delete	Screen	Flip	Mirror	Capture	Screenshot

Record	Screen Record	High-content mode	Crop to equal scale

Annotation Tools

Pencil	Glow stick	Straight line	Arrow	Rectangle	Round	Triangle	Concentric circles	Font	Add text

Measuring tools

PrimeCam Pro provides the commonly-used measurement tools & scale bar, and supports the generation of reports in PDF, Word or Excel format according to measurements.

Linear distance	Circular	Rectangle	Three-point angle
Parallel line spacing	Center distance of double parallel lines	Polyline	Polygon
Arc	Three-point vertical line	Four-point angle	Ellipse
Circle radius	Three-point drawing circle	Concentric circle	Concentric radius circle center distance drawing circle
Ring	Manual count	Font	Scale mark
Scae bar	Calibration

Camera properties settings

With image properties memory function, restarting the software will restore the image properties value before the software is closed. Support adjusting target brightness, exposure, gain, white balance, image RB parameters, contrast, chroma, saturation, sharpness, gamma, restore the default parameters (Default) and etc.

Automatic depth-of-field fusion function for high content images

The automatic depth-of-field fusion function for high content images uses cutting-edge image processing algorithms and real-time fusion technology, aiming to break through the limitation of insufficient depth-of-field in high magnification objective lenses, and to adjust the focal length can obtain a greater depth of field, thus obtaining a sharper image than a real-time single-frame image. Support PrimeCam PRO and higher resolution cameras, take one picture, two archives.

Microscopic images — Image after using the high content function

Microscopic images — Image after using the high content function

Manual counting function

Convenient to count the number of cell nuclei and export statistical reports with one click

Statistical reports

Prime Life Science

Manual counting function

PrimeCam Pro is an Android version APP, which is pre-installed into the PrimeCam cameras or smart cameras at the factory and does not need to be installed by the user. After the camera hardware starts, it will automatically enter the PrimeCam main interface. This APP can not be uninstalled by the user, but it can be updated and upgraded through a USB flash drive.

Calibration and Measurement

Built-in calibration for 4X, 10X, 40X, 100X of microscopes CX23, Ei, E100, students do not need to calibrate themselves; support creating calibration for other microscope models.

Calibrate | Measure a straight line | Measure a circle | Measure a rectangle | Measure an angle

Application built-in stand-alone Cameras

Camera properties settings

With image properties memory function, restarting the software will restore the image properties value before the software is closed. Support adjusting target brightness, exposure, gain, white balance, image RB parameters, contrast, chroma, saturation, sharpness, gamma, restore the default parameters (Default) and etc.

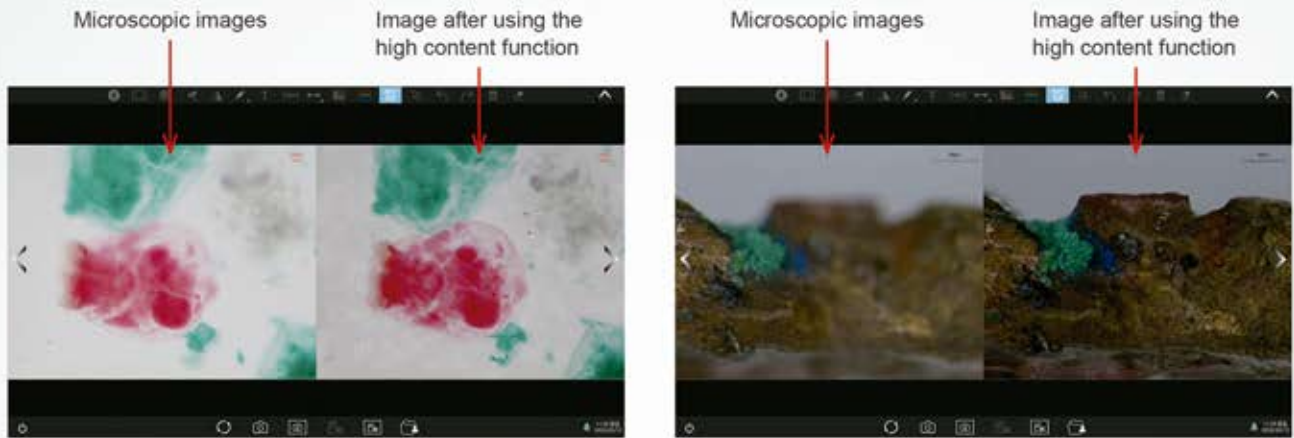

Preference Settings

Users can set preferences such as language, brightness, sound, video duration, scale bar, back up f iles to a USB drive, restore factory settings, etc.

Automatic depth-of-field fusion function for high content images

The automatic depth-of-field fusion function for high content images uses cutting-edge image processing algorithms and real-time fusion technology, aiming to break through the limitation of insufficient depth-of-field in high magnification objective lenses, and to adjust the focal length can obtain a greater depth of field, thus obtaining a sharper image than a real-time single-frame image.

Provide two QR codes for cell phone/tablet to download APP and scan to live stream image.

Image and docs management

Image and video gallery:
Files can be viewed, renamed, copied to a USB drive, etc.

App for smart devices: PrimeCam Pro 5G WiFi

A Preview: Image preview window.

B Folder manage: photos and videos management.

C Scan: scan the camera's serial number QR code to obtain images (to ensure preview speed, it is recommended that no more than 10 smart terminals are connected to the same camera at the same time).

**D Settings:** App settings.

E Operation guide: show/hide.

Navigation interface

Commonly used tools: annotations, measurements, image capture

Straight line	Arrow	Round	Oval	Measure a rectangle	Measure a circle
Measure an angle	Measure a straight line	Hand-draw	Select	Delete	Add text
Font	Color	Eraser	Rotate	Add a picture	Calibrate
High-content mode	Flip Mirror	Rotate	Capture	Record	Open

Camera settings

Almost adjustment-free, open manual adjustment, support adjusting target brightness, auto/manual exposure, gain, auto/manual white balance (RB channels are adjusted separately), contrast, chromatic, saturation, sharpness, gamma, restore default
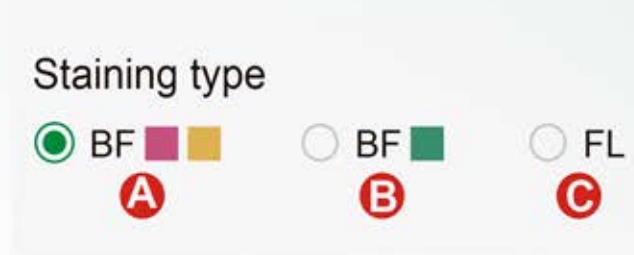

Staining type based on color calibration

Users can choose different image modes according to the staining method of pathological sections to obtain more accurate image color.
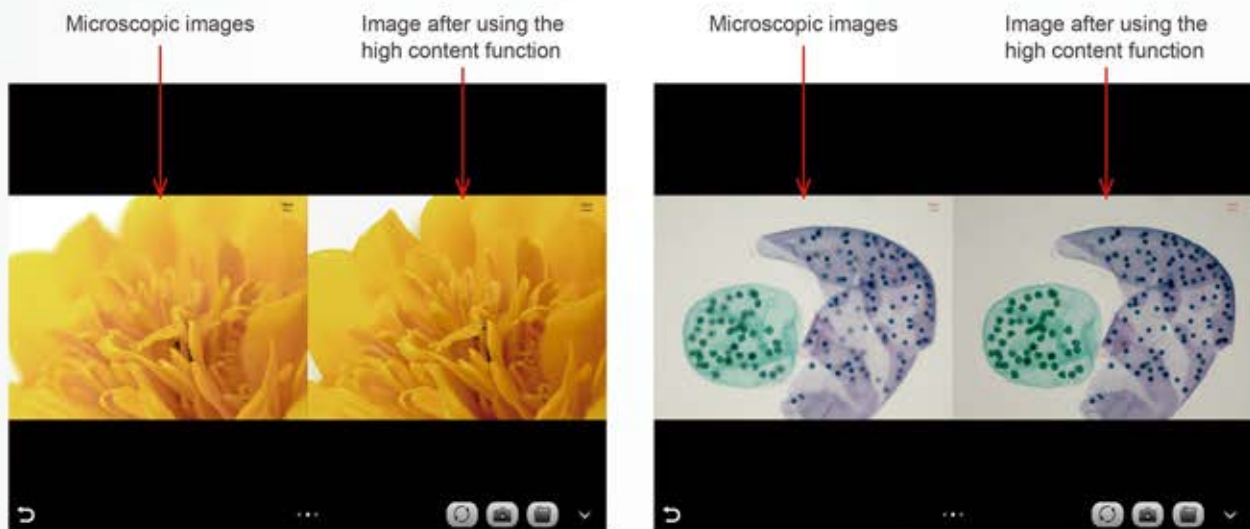

Staining type

Preset mode

A Used in bright field for slides mainly in pink or gold.
B Used in bright field for slides mainly in cyan.
C Used in fluorescence mainly

Automatic depth-of-field fusion function for high content images

The automatic depth-of-field fusion function for high content images uses cutting-edge image processing algorithms and real-time fusion technology, aiming to break through the limitation of insufficient depth-of-field in high magnification objective lenses, and to adjust the focal length can obtain a greater depth of field, thus obtaining a sharper image than a real-time single-frame image. Support PrimeCam Pro 12.0MP and higher resolution cameras, take one picture, two archives.

Folder Management

Supports viewing pictures and videos, renaming, exporting to local albums, sharing to social networks, deleting, and searching by file name.

Specifications

Applicable to	Nikon	Olympus	Leica	Zeiss
Models	Intervision 12 PRO S			
Physical Resolution	12.0 MP			
Image Sensor	SONY IMX412 CMOS			
Exposure Mode	Rolling Shutter			
Maximum Resolution	4000x3000 (12000Pixels)			
ISO sensitivity	Equivalent to 100-12800			
Sensor Size	1/2.3"			
Pixel Size	1.55µmx1.55µm			
Spectral Response	380-650nm			
Exposure Capability	Real-time auto and manual adjustment			
Exposure Time	10µs×333ms			
White Balance	Real-time auto and manual RB adjustment			
Preview Resolution	4000x3000@30fps - 3840x2160@30fps			
Power Suplly	DC 12V 5A			
WiFi Protocol	5G WiFi IEEE802.11ac			
Convertion Bit Depth	12bit			
Software and App	PrimeCam			

Certifications

1. Comply with FCC certification of The US Federal Communication Comission.
2. Comply with European (standard) safety CE certification.
3. Comply with the MIC certification issued by the Ministry of Internal Affairs and Communications of Japan (Eletric Wave Method and Electro-Optical Communication Business Law).
4. Comply with Jate certification of Japaneses telecommunications law directive.
5. Comply with the "Directive on the Restrictive of the Use of Certain Hazardous Substances in Eletrical and Eletronic Equipment" (RoHS) Directives in accordance with EU legistation.
